EDUCATION

Degree in Software Engineering | Universidad de Oviedo

2015 - PRESENT

EXPERIENCE

Programmer | Scalian

04/2024 - PRESENT

- Expert level training on the EasyVista platform
- Managed Unicaja's ITSM build on EasyVista, developed new service requests, integrated with other ITSM platforms and managed the inventory and incidents data.

Programmer | Capgemini

05/2023 - 04/2024

- Training in React, Angular and SpringBoot
- I maintained web services and portals based on SpringBoot, mainly updating libraries also Java and SpringBoot versions, as well as bug fixes and small developments.
- I developed a new web service based on springBoot to unify the data collection from several portals, improving their maintainability.

Programmer | Inovace

02/2022 - 08/2022

- I developed and maintained websites using PHP, CodeIgniter, WordPress, Bootstrap and JavaScript; I also maintained databases in MySQL.
- Gathered requirements for the development of a new project management tool.
- Successful implementation of Git for version control management in projects.
- I redesigned the backend of the sales portal, implementing a Model-View-Controller (MVC) architecture that improved the stability and maintainability of the system.

Internship in web development | Envista

02/2021 - 04/2021

- Evaluated different technology stacks for the creation of a new project management web portal.
- I developed the login and user management system using the PEAN stack (Postgres, Express, Angular and Node.js) and integrated AdminLTE templates.

Other knowledge and skills

Driving license:

- Spanish B category

Personal skills:

- Adaptability
- Continuous learning
